

Mission Statement

Our mission at LePage & Sons is to provide high quality waste management solutions which are environmentally sound — from the responsible disposal of excess waste to the convenient and practical collection of materials which can be recycled.

True Waste Solutions

The New Shade of Green

LePage & Sons started small in 1999 with one truck and ten boxes. Today we have a fleet of 10 trucks, nearly 1,000 containers and have earned the reputation as a rock-solid, dependable waste solutions company in the Twin Cities metro area.

Despite our growth, we still remember how we started, and who keeps us going...our customers. We're small enough where you can receive personal attention, yet big enough to take on large projects.

Whatever your waste management needs may be, LePage & Sons will be there to serve them...and you!

We rely on LePage & Sons to keep our job site clean! Because of their prompt delivery, and knowledge of the waste industry, we have been able to save thousands of dollars, reduce our carbon footprint on the environment and significantly minimize our risk of fines for disposal of construction waste.

Darren Kiser, President
Kiser Construction Inc.—St. Michael, MN
